

TESTIMONIAL

Date: 10.07.2014

We, WABCO - India, 100% EOU Plant at Mahindra city, Chennai have been using Pro-QMS Software for maintaining SPC for Special Characteristics in our manufacturing Process.

Initially we started using in machining cells and subsequently DSS came forward in extending to assembly cells customized to suit our requirements.

It provides real time monitoring of \bar{X} - R chart, Process monitoring chart, Histogram and Cpk dashboard.

We are happy with the response and promptness of the Chennai team in training of our team and attending to service requirements.

Further looking forward in extending the same other applicable areas.

For WABCO India Limited,

Mahindra city.
